

ABSTRACTSYSTEM AND METHOD FOR CLOSING A TANK OPENING

5 System for sealing an opening of a plastic tank with a multilayer structure by
means of a plate, itself constituted by a multilayer polymer structure compatible with
the wall of the tank.

10 Method for sealing such a tank by welding a plate with a multilayer structure
compatible with the external wall of the tank. One or more accessories can be
attached to the plate and inserted into the tank.

Utilization of the method to seal a fuel tank for a motor vehicle.
